

## General Information

# Upholstery Care and Cleaning Guide

*Applies to: All Strength Upholstery*

In order to keep the upholstery in performance shape, it is important to keep it clean and free of abrasive chemicals. While staining and soiling exposures are common to upholstery fabrics, most stain and soiling may be removed by using the simple cleaning methods below.

**For general cleaning:** A solution of 10% mild soap with warm water applied with a soft damp cloth OR Formula 409 applied to a cloth then wiped onto the upholstery.

**For disinfecting:** Use a mixture of 1:10 bleach-to-water mixture, apply with a soft damp cloth.

### **After cleaning/disinfecting:**

- Ensure all excess moisture is removed from the upholstery after cleaning/disinfecting.
- After cleaning, rinse area with clean water, then dry with a clean, lint-free cloth.
- Failure to remove chemical residue will cause discoloration of the coated fabric surface to manifest earlier in the life cycle of the product.

### **Please review carefully:**

- Inclusion in this document does not imply “fit for use.” Customers should first determine if products are appropriate for use on their surfaces.
- Should other cleaning methods or products be employed, carefully try them in an inconspicuous area to determine potential damage to the material.
- Never use harsh solvents or cleaners which are intended for industrial applications.
- To clean stained or soiled areas, a soft white cloth is recommended - avoid use of paper towels.

**CAUTION:** Cleaning products may be harmful/irritating to your skin, eyes, etc. Use protective gloves and eye protection. Do not inhale or swallow any cleaning product. Protect surrounding area/clothing from exposure. Use in a well-ventilated area. Follow all product manufacturer’s warnings. CORE Health and Fitness cannot be held responsible for damage or injuries resulting from the use or misuse of cleaning products.
